

OSHA Authorized 30 Hour General Industry Training

Description

Our OSHA 30-Hour General Industry course is designed for supervisors, leads, seasoned employees, and those looking to enhance their occupational safety education journey with strong building blocks to aid their future success. Participants will become more familiar with 29 CFR 1910 through this engaging in-person course designed to prepare supervisors and workers to, not only, avoid workplace safety and health hazards, but remediate them as well. Our course goes beyond the basics of hazard identification and avoidance, providing participants with information on hazard mitigation and administrative requirements crucial to providing employees with a safe and healthy working environment and staying in compliance.

Required Topics		Elective Topics
Intro to OSHA	Bloodborne Pathogens	Safety and Health Programs
Managing Safety and Health	Ergonomics	Powered Industrial Vehicles
Walking and Working Surfaces	Confined Space	Patient Handling Program
Exits Routes and EAPs	Lockout Tagout	Workplace Violence
